RE: Approval of SATAjet 1000 B RP, SATAjet 100 B P, and SATAjet 100 B F RP Spray Guns for Butte County

The Butte County Air Quality Management District (District) has completed our review of your request regarding the SATAjet 1000 B RP, SATAjet 100 B P, and SATAjet 100 B F RP Spray Guns use in Butte County. The results of the transfer efficiency testing indicate that the SATAjet 1000 B RP, SATAjet 100 B P, and SATAjet 100 B F RP Spray Guns are capable of achieving equivalent or better transfer efficiency than high-volume, low-pressure spray equipment. The District approves SATAjet 1000 B RP, SATAjet 100 B P, and SATAjet 100 B F RP Spray Guns for operations subject to Rule 235—*Requirements for Vehicle and Mobile Equipment*, under Section 3.5.5. This approval is subject to the following conditions:

1. A written notification will accompany each SATAjet 1000 B RP, SATAjet 100 B P, or SATAjet 100 B F RP Compliant Spray Gun sold or distributed for use with the District that states the spray gun is only approved for application of coatings subject to District Rule 235.
2. The maximum allowed pressure to the Compliant Spray gun shall not exceed 32 psig. A clearly visible, permanent label specifying the maximum inlet pressure shall be attached to each spray gun for sale or distribution within the District.
3. Each SATAjet 1000 B RP, SATAjet 100 B P, or SATAjet 100 B F RP Spray Gun sold or distributed within the District shall include a SATA air micrometer with gauge 0/8455 (product number 27771), SATA adam digital air micrometer with gauge (product number 130146), or SATA adam 2 digital air micrometer with gauge (product number 160853) and shall include written notification attached to the spray gun that the use of this part in good working condition is required during actual operation.
4. This authorization is only valid if the S SATAjet 1000 B RP, SATAjet 100 B P, or SATAjet 100 B F RP Spray Gun has the above required labels and gauges during actual operation.
5. Any modification to the spray gun design invalidates this approval unless such modification is approved by the District.

If you have any questions regarding this approval, please contact me at (530) 332-9400, extension 107 or via email at dlusk@bcaqmd.org.

Sincerely,

David J. Lusk
Senior Air Quality Engineer

Enclosure: District Rule 235
