Dear Mr. Georg Drakos:

After reviewing your request, the Maryland Department of the Environment has determined the referenced spray guns are acceptable alternatives to high-volume low-pressure (HVLP) spray guns for all VOC coating processes regulated under COMAR 26.11.19.

This approval is subject to the following conditions:

1. SATA Farbspritztechnik GmbH & Co. KG shall supply with each spray gun written notification that the maximum air pressure supplied to the spray gun shall not exceed 35 psig.
2. SATA Farbspritztechnik GmbH & Co. KG shall supply with each spray gun a gun mounted pressure gauge clearly identifying the maximum allowable inlet air pressure of 35 psig, and a gun mounted air pressure regulating device.
3. SATA Farbspritztechnik GmbH & Co. KG shall supply with each spray gun written notification that the gun mounted pressure gauge and air pressure regulating device must be attached to the spray gun, and be in good working condition, whenever the spray gun is in use.

This approval is only valid for the referenced spray guns.
